DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1, 3, 5-6, 23-26 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by

Stracovsky, US. Pat. No. 6,587,894.

3. Claims 1, 3, 6, 23 and 31, Stracovsky teaches a method for selecting an optimal command node in a computing device having an insert queue containing a command node and a sorted queue containing another command node, the method [*title, abstract*], comprising the steps of;

- a. Determining if the command node in the insert queue collides with the command node in the sorted queue [*abstract, col. 3, lines 28-35*];

- a.i. if the command node in the insert queue does not collide with the command node in the sorted queue, then moving the command node in the insert queue from the insert queue to the sorted queue [*abstract, col. 3, lines 10-44*];

Art Unit: 2182

a.ii. if the command node in the insert queue collides with the command node in the sorted queue, then correcting the collision [*abstract, col. 3, lines 10-44*]; and

b. Sorting the sorted queue according to a predetermined routine to determine an optimal command node and selecting the optimal command node [*abstract, col. 3, lines 14-19*].

4. Claim 5, Stracovsky teaches the act of moving the command node in the insert queue to the sorted queue comprises extracting the command node from the insert queue and inserting it into the sorted queue [*col. 3, lines 10 -45*].

5. Claims 24-26, Stracovsky the sorted queue includes only non-colliding command nodes [*col. 3, lines 24-28*].

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stracovsky, US. Pat. No. 6,587,894.

8. Claims 27-30, Stracovsky fails to teach the each of the queues is structured as a doubly-linked list.

However, double-linked list drop-off queues, are old and well known in the art.

Art Unit: 2182

It would have been obvious to modify the teachings of Stracovsky to include each of the queues is structured as a doubly-linked list, because any item on the queue can easily be removed from the queue without linearly traversing the whole queue from either the beginning or the end in order to determine the location of the removed item.

Allowable Subject Matter

9. Claims 2, 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
10. Claims 7-22 are allowed.
